**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 8, 11, 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al.

Lee discloses determining that the exercise activity should be performed according to a first muscular phase col. 8, lines 21 – et seq.; providing a first user perceptible output from the coaching device to prompt the user to operate the exercise apparatus according to the first muscular phase col. 8, lines 21 – et seq.; determining that the exercise activity should be performed according to a second muscular phase that differs from the first muscular phase col. 8, lines 21 – et seq.; and providing a second user perceptible output from the coaching device to prompt the user to operate the exercise apparatus according to the second muscular phase, wherein the second user perceptible output differs from the first user perceptible output col. 8, lines 21 – et seq., determining that the exercise activity should be performed according to a third muscular phase that differs from the first and second muscular phases; and providing a

third user perceptible output from the coaching device to prompt the user to operate the exercise apparatus according to the third muscular phase, wherein the third user perceptible output differs from the first and second user perceptible outputs col. 8, lines 21 – et seq., the first, second and third user perceptible outputs comprise a visual display col. 8, lines 21 – et seq., wherein the first, second and third user perceptible outputs comprise an audio output col. 8, lines 21 – et seq., the first and second user perceptible outputs comprise a visual display col. 8, lines 21 – et seq.,

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 7, 12, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al.

Lee does not specifically detail the first muscular phase is a concentric phase, the second muscular phase is an eccentric phase, and the third muscular phase is an isometric phase. the concentric, eccentric, and isometric phases each last for 2 to 8 seconds, however they are obvious design choices as they are well known variants if performing an exercise routine and are the various species of claims 12, 15 and 16.

***Allowable Subject Matter***

Claims 5, 6, 9, 10, 13, 14, 17 and 18, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
